

This tutorial shows you how to review the security log.

Security log provides you the ability to review activities history for your Medenotes account.

1. You are required to login before you can share your profile.
2. Click **View Security Log** on the *Common Tasks Sidebar* located on the left hand side of the page. It redirects you to the page where you can review your security log.

Fig 1 Reviewing the security log – View Security log link.

3. This page shows you when and the corresponding IP address for the past activities happened to your profile.
